7. Read the following passage carefully and answer the questions given at the end :

Making pottery on the potter's wheel is called "throwing". The thrower is a very skilful workman. But there is another method of shaping articles out of clay, 'moulding'. A plaster mould is made and the clay is pressed into it. This is a quicker and less difficult way and must be used to make things like handles; but all the most beautiful pottery is thrown. When a piece of pottery is taken off the wheel, it is put aside to dry, after which a design may be painted on it with special colours that will stand great heat; it is then ready to be fired. This is done in a large oven or kiln. The pieces of pottery are placed in earthenware tubs called 'saggers' so that the flames cannot touch the pottery.

QUESTIONS :

- What is 'throwing'?
- What is the other method of shaping articles?
- What is the advantage of 'moulding'?
- How does the potter make designs on the pieces of pottery?
- How are the pieces of pottery baked in fire?

7. Read the following passage carefully and answer the questions given at the end :

Early rising is a good habit as it gives us early start of our day's work. We gain time while the late risers are asleep. The early risers have another advantage also and that is that they enjoy good and sound health. Those who are out of bed early have plenty of time to do their work carefully, steadily and completely. They do not have to put off anything to the next day. The early riser is always happy, fresh and smart. He enjoys his work while those who get up late find their duty dull and dry and do it unwillingly. Early rising is therefore, a key to success in life.

QUESTIONS :

- What kind of habit early rising is?
- Why can an early riser do more work than the late riser?
- Why does an early riser enjoy good health?
- Why does a late riser find his work dull and dry?
- What is the key to success in life?
